We are told we have all kind of impact factors; please note that they are not calculated by JCR. However, if you want to have an idea about the impact of our publication, use the metrics published by Scopus Elsevier and Scimago. You can find there also a "2 year impact metrics" similar to the JCR impact factor. We would not pay attention to other impact factors than those calculated by JCR and Scopus.

CABI is a not-for-profit international organization that improves people's lives by providing information and applying scientific expertise to solve problems in agriculture and the environment. Their mission and direction is influenced by their member countries who help guide the activities they undertake. These include scientific publishing, development projects and research, and microbial services. 2010 marked 100 years of CABI. Since its beginnings as an entomological committee in 1910, it then developed into a Commonwealth organization before becoming a truly international service in agricultural information, pest identification and biological control in the mid 1980s.

EBSCOhost® databases are the most-used, premium online information resources for tens of thousands of institutions worldwide, representing millions of end-users.
